### Editorial Note

Insight Biomedicine is a multidisciplinary peer-reviewed journal dedicated to publish high quality research work in all areas which are related to the science of biomedicine, medicine, biology and biochemistry. Topics of interest include but are not limited to: anatomic pathology, genetics, immunology, biochemistry, microbiology and virology, neurosciences, molecular and cellular and cancer biology, pharmacology and physiology, biomedical research, biochemistry, genetics, biomedical engineering, immunology, microbiology and virology, biophysics, molecular, cellular and cancer biology.

Biomedicine involves the study of patho-physiological processes with the methods from physiology and biology. Approaches range from understanding molecular interactions to the study of the consequences at the *in vivo* level. These processes which are studied with the particular point of view of devising new strategies for the diagnosis and therapy of disease to treat accurately.

Considering the importance of human health and emergency medical and clinical issues associated with it, prime attention towards biomedical research is of great significance. Thus, providing a common and enriched information sharing platform.

Insights in Biomedicine journal aims to encourage interdisciplinary discussions and contributing to the advancement of medicine, benefiting readers and authors by accelerating the dissemination of research information and providing maximum access to scholarly articles.

All articles published by Insights in Biomedicine are made freely and permanently accessible online immediately upon publication, without subscription charges. Peer review methods are used to maintain quality standards, improve performance, and provide credibility. The main goal of this practice is to improve the relevance and accuracy of scientific discussions.

All published articles of this journal are included in the indexing

and abstracting coverage of Index Copernicus, Google Scholar, China National Knowledge Infrastructure (CNKI), Cosmos IF, Publons, Secret Search Engine Labs), Studies receiving funding from a funding organization that is included on the list of PMC and Research Funder Policies or authors having NIH grant were submitted to PubMed.

Benefits of publishing with Insights in Biomedicine journal are high visibility, speed of publication after qualitative peer review process. Open access policy allows maximum visibility of articles published in the journal as they are available to a wide, global audience.

Insights in Biomedicine articles are published under the terms of the Creative Commons Attribution License which permits use, distribution and reproduction in any medium provided the original work is properly cited.

I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of Insights in Biomedicine for their valuable support and we look forward to bring out the last issue release of Volume 5 of Insights in Biomedicine in scheduled time i.e., Volume 5, Issue 6 by the end of December month in 2020.
