

Editorial Note on Molecular Biomedicine Chih-Chang Chu*

Received: January 23, 2021; **Accepted:** January 26, 2021; **Published:** January 29, 2021

Insights in Biomedicine journal is an open access, peer-reviewed journal that encompasses all fundamental and molecular aspects of basic medical sciences, with an emphasis on the molecular studies of biomedical problems and molecular mechanisms. Topics of interest include, but are not limited to [biomedical research](#), biochemistry, genetics, [biomedical engineering](#), immunology, microbiology and virology, [biophysics](#), molecular, cellular and cancer biology.

The journal is broad scoped and considers topics from all related subjects of biomedicine. Topics involved in promotion of basic and applied biomedical research and their impact on clinical investigation, novel clinical methodologies for better healthcare, innovative applications for tackling human health problems will be given priority for publication.

Considering the importance of human health and emergency medical and clinical issues associated with it, prime attention towards biomedical research is of great significance. Thus, providing a common and enriched information sharing platform.

[Insights in Biomedicine](#) journal aims to encourage interdisciplinary discussions and contributing to the advancement of medicine, benefiting readers and authors by accelerating the dissemination of research information and providing maximum access to scholarly articles.

Insights in Biomedicine journal provide a scientific communication medium to discuss the utmost advancements in the domain of biomedical sciences. This journal aims to assemble and reserve precise, specific, detailed data on this immensely important subject.

All articles published by Insights in Biomedicine are made freely and permanently accessible online immediately upon publication, without subscription charges.

Peer-review is the system used to assess the quality of a manuscript before it is published. Researchers in the relevant research area assess submitted manuscripts for validity and significance to help editors determine whether the manuscript should be published in their journal.

All published articles of this journal are included in the indexing and abstracting coverage of Index Copernicus, Google Scholar, China National Knowledge Infrastructure (CNKI), Cosmos IF, Publons, Secret Search Engine Labs), Studies receiving funding from a funding organization that is included on the list of PMC and Research Funder Policies or authors having NIH grant were submitted to PubMed.

Benefits of publishing with Insights in Biomedicine journal are high visibility, speed of publication after qualitative peer review process. Open access policy allows maximum visibility of articles published in the journal as they are available to a wide, global audience.

Insights in Biomedicine articles are published under the terms of the Creative Commons Attribution License which permits use, distribution and reproduction in any medium, provided the original work is properly cited.

I would also like to express my gratitude to all the authors, reviewers, the publisher, the advisory and the editorial board of Insights in Biomedicine for their valuable support to bring out the [Volume 6](#) of Insights in Biomedicine in scheduled time.
